

# impendium

We helped redesign Impendium's front-end experience, while keeping the user in mind.

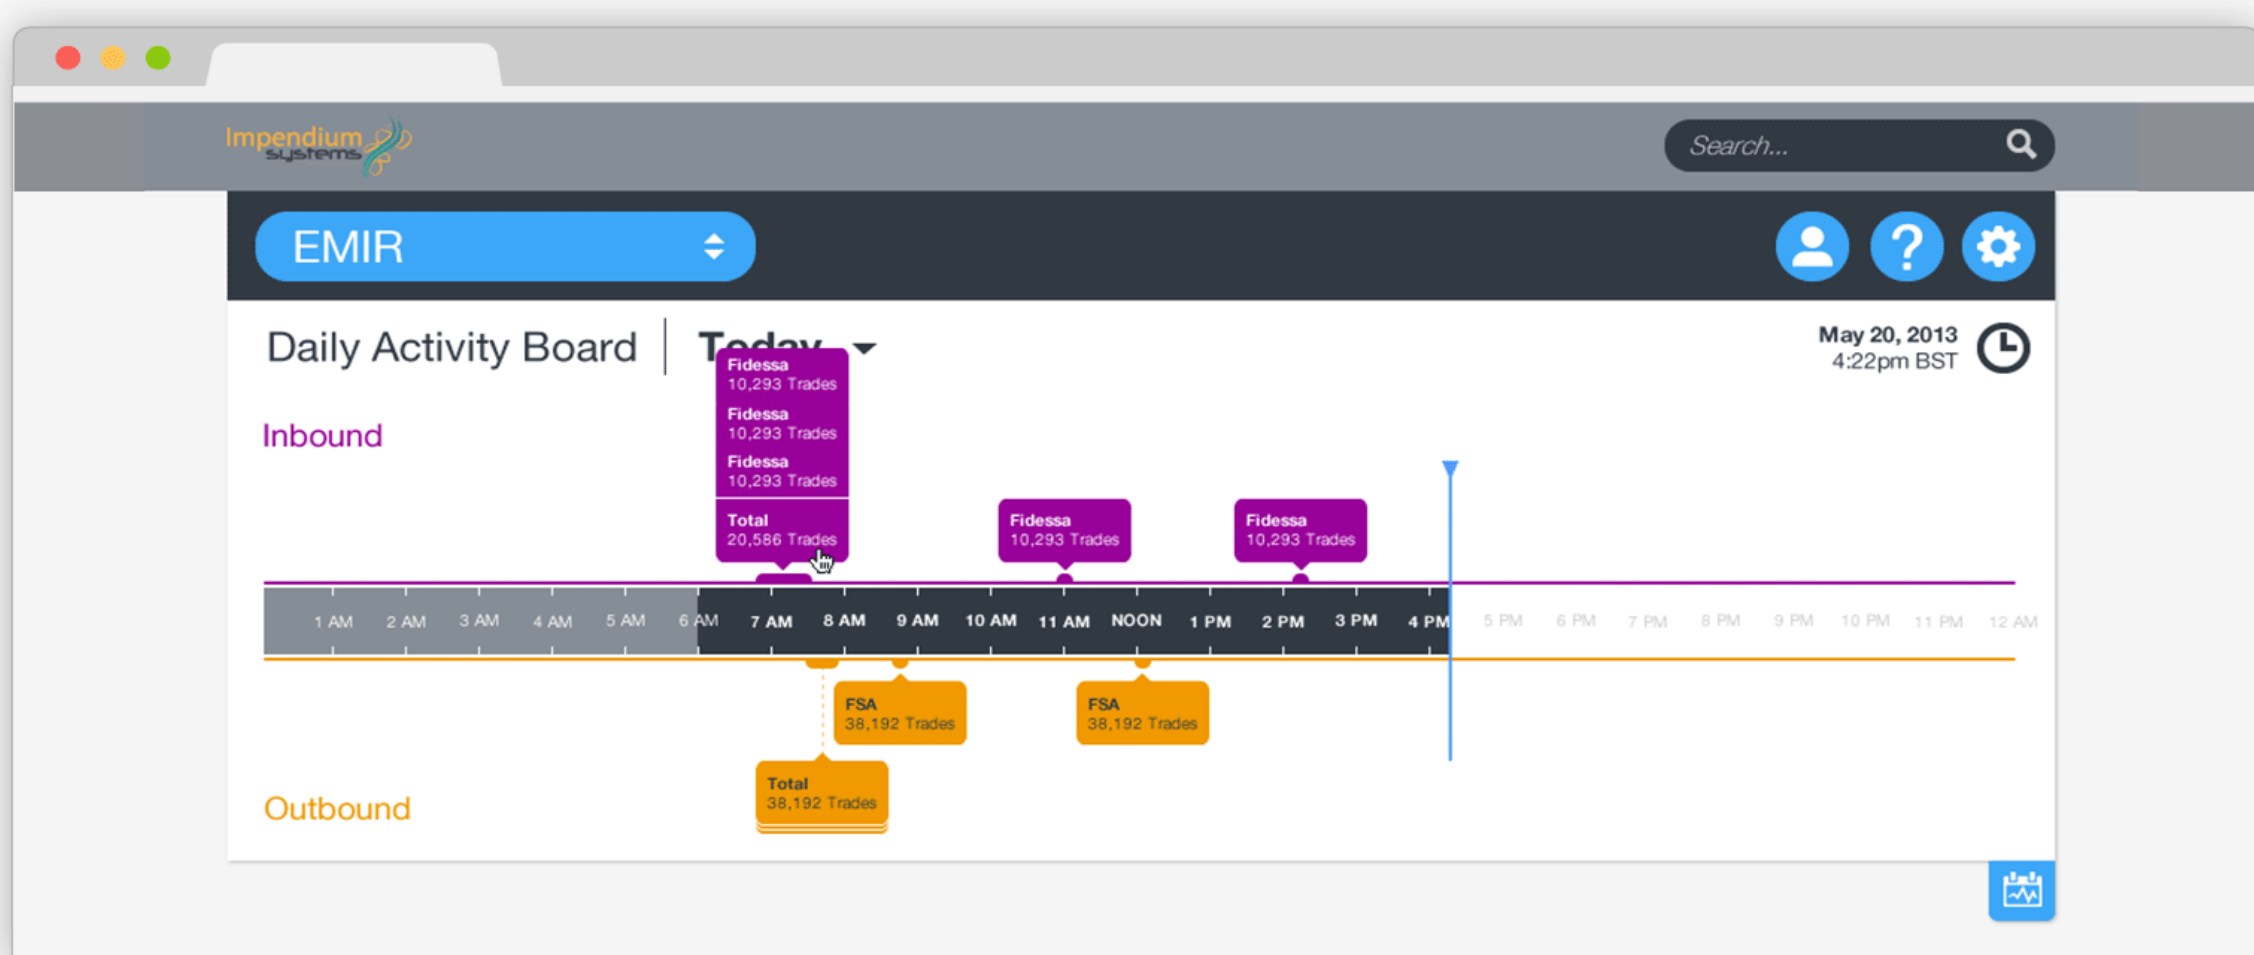

## A User-First Approach

We improved the ease-of-use of the system for Impendium's end users.

## Complex, Simplified

We focused on implementing easy visualisation of Impendium's complex regulatory data.

## Designs Driven by Customer Insights and Data

Client and customer feedback was gathered and used to drive further design improvements. The front-end was rebuilt and redesigned with the user in mind, all while keeping to existing brand guidelines.
